## We would love to welcome your Year 4 and Year 5 pupils into our school to take part in interactive, hands on sessions in different subject areas:

**Art and ceramics:** Pupils will use clay to sculp model birds. These will be fired in our kiln and then pupils can paint the models to bring them to life!

**French:** we will tailor an afternoon of engaging French activities to suit the level of language of your pupils. For example, exploring how to describe the colour and size of the planets.

**Music:** Session 1: Practical. Pupils will learn the techniques to chair drum along with backing tracks followed by an introduction to the Ukulele. Pupils will also develop their confidence to sing. Session 2: This will be ICT based. Pupils will use the mixcraft software to create their own pieces of music.

**Science:** A tailored challenge for your current curriculum based on investigative approach, relevant to science in the real world.

**English:** Pupils will read, listen to and perform poetry and use their reading as a stimulus to help them craft their own writing. Together, we will create a poetry anthology.

**Sport:** Pupils can take part in a range of team sports ranging from the traditional to the more obscure. Pupils can also have sessions on our climbing wall.

**Technology:** Pupils will use learn to use the workshop tools and equipment to cut and combined natural wood to create either; block heads made out of recycled materials or a wooden pencil holder.

### If there is anything else you'd like us to offer then just ask!

- We'd love to develop continuity through Year 6 and 7 schemes of work to make pupil transition to secondary school less stressful for pupils. At the same time we can offer CPD for your staff in specialist teaching areas such as Science, Technology, Music and Languages.
- Look out for lots of sports competitions run in collaboration with our PE department.
- STEM challenge. We will be inviting local primary schools to send teams to take part in a STEM challenge later in the year.
